PRACHI J. VAKHARIA
QUANTUM COMPUTING SCHOLARSHIP
Womanium Quantum 2022: Global Quantum Computing & Entrepreneurship Program

Dear Gaurish Korpal,

Womanium Foundation is glad to hereby inform you that your application and request for Womanium Scholarship for the Global Quantum Computing & Entrepreneurship Program has been accepted and granted!

Womanium Quantum Scholarship grants you a full-fee waiver for the Global Quantum Computing & Entrepreneurship Program. The program has been scheduled for July to August of 2022.

Womanium Foundation has been working with over 150 National and International Speakers, Quantum Companies, Quantum Labs, Government entities, Schools, Colleges and Universities and more to bring in talented young students to opportunities in STEM+Entrepreneurship though direct exposure – including, but not only, to the likes of the upcoming Global Quantum Computing & Entrepreneurship Program.

With that goal, Womanium's founder and patroness, Ms. Prachi J. Vakharia, is providing scholarships to all the winning applicants of the Womanium Quantum 2022 Program.

This letter is to convey the following about the Womanium Scholarship:

A. **Womanium Foundation will be giving scholarships to all the selected student participants for the Global Quantum Computing & Entrepreneurship Program.**
B. **All scholarships will be provided by Ms. Prachi J. Vakharia under her name through Womanium to cover all the common costs for you for the duration of the Program.**
C. **You will be attending the Global Quantum Computing & Entrepreneurship Program for FREE, with no charge to/from you or to participating companies, thereupon.**
D. **The scholarship covers only the common costs applicable to all the students, and not any individual costs incurred by any particular student. The students must, therefore, pay for the individual costs of transportation, food, housing, etc. as required differently by each student on a case by case and country by country basis.**
E. **The program is purely and solely for educational and training purposes only. The program's only goal is to advance STEM+Entrepreneurship and encourage more young women in STEM+Entrepreneurship.**

SCHOLARSHIP REQUIREMENTS FROM YOU:

1. **Feedback Reports : Submit timely reports and feedback to the team and companies to evaluate you, your experience and skills during the program.**
2. **The report must detail the Global Quantum Computing & Entrepreneurship Program covering the lessons learnt, and exhibits and facilities seen during industry and lab tours.**
3. **This report will be used to assess the impact and lessons learnt by each student/participant so as to help and guide you further.**
4. **The report *might* also be shared with others – students, schools, companies, others, etc. – to improve the lessons and programs in the future, and to help the students more.**
5. **Every student must write the report covering the experience at the program, the things seen, the lessons learnt and the impact and effect it had on them, personally and professionally.**
6. **Each report will also be used to share the lessons learnt with other students who could not attend this program in July & August 2022. This is to facilitate shared and collective learning for girls and women even beyond the selected group.**
7. **Based on the feedback, Womanium will work with each student to further guide, mentor and support to advance you in the Quantum fields and STEM+Entrepreneurship. Feedback will be used to pair students in the future with the right mentors, companies, teams and partners.**
8. **Advance STEM+Entrepreneurship : Help and assist to advance STEM+Entrepreneurship for all by any and all means you can. Support, encourage, assist and help others to enter, pursue, learn and advance STEM+Entrepreneurship globally!**

Womanium beyond Global Quantum Computing & Entrepreneurship Program

Womanium Team is also working with other industry and institutional partners beyond Quantum Computing to create new programs to build and teach girls and young women about STEM+Entrepreneurship. Each student will be shared more information about these programs in detail later. Womanium wants the young STEM+E leaders of tomorrow to not only know about advanced fields and developments like Quantum Computing, but also wants the young female STEM+E leaders of tomorrow to have the skills, knowledge and confidence to design, build and lead such systems and companies. Womanium Quantum 2022 is designed just for that: to create the future leaders of Science, Technology & Entrepreneurship!

With that, we at the Womanium Foundation congratulate you on winning the
Prachi J. Vakharia Quantum Computing Scholarship
and welcome you to the
Womanium Quantum 2022 : Global Quantum Computing & Entrepreneurship Program

Welcome, Greetings & Congratulations to you Gaurish Korpal!

This letter has been or will be communicated to all the winning students, schools, colleges, universities, teachers, parents, faculties, companies, etc. as well as Womanium's Quantum Computing Partners.

Yours truly,
Womanium Team
Washington DC USA
